🎓 Education

Computer Engineering

TED University ✓

2021 – 2026 | Ankara, Türkiye

I continue my education in the Computer Engineering department at TED University, with a minor in Economics and an additional focus on Business. During the training process, I focused on basic engineering topics such as solutions, software development, data designs and artificial intelligence. As a member of the HSD Core Team at the university, I had the opportunity to improve my teamwork and leadership skills. I also participated in different internship programs to gain technical skills and professional experience. I aim to develop further in the fields of artificial intelligence, big data and entrepreneurship in the future.

💼 Professional Experience

Intern

DataKontrol Bilişim Teknolojileri

07/2024 – 08/2024 | Ankara, Türkiye

- Worked on SQL database design and management as part of an ERP-based
- Optimized database structures and wrote SQL queries to enhance application performance
- Ensured data accuracy and consistency by cleaning and validating datasets before analysis.
